

\$10 billion project to add liquefaction & export capabilities to Golden Pass LNG import terminal

PARTNERS

Golden Pass LNG was formed by affiliates of Qatar Petroleum and ExxonMobil – a partnership of two leading energy companies with an unrivaled record of producing, shipping and marketing natural gas globally.

Extensive experience of the project shareholders provides the technology, marketing and financial strength to construct a world-class liquefaction and export facility.

ABOUT

The project will utilize existing tanks, berths and infrastructure, and new facilities will be constructed for natural gas pretreatment and liquefaction with an estimated export capacity of 15.6 million tons of LNG per year.

COMMITMENT

The project will be constructed and operated with the same unwavering commitment to safety as the existing facility. It will leverage the existing site and facilities to minimize environmental and community effects.

BENEFITS

\$10 billion investment in infrastructure at the facility

\$34 billion in U.S. economic gains over life of project

Thousands of jobs during construction
19,000 construction jobs and
45,000 direct & indirect full-time jobs

Hundreds of full-time jobs once operational
200+ new direct jobs at Golden Pass and 5,200
direct & indirect jobs for the life of the facility
