

Golden Pass LNG

Unrivaled Experience | Global Vision | American Jobs

ABOUT

Golden Pass LNG is a \$10 billion project to add liquefaction and export capabilities to the existing liquefied natural gas import terminal near Sabine Pass, Texas.

New facilities for natural gas pretreatment and liquefaction will be constructed.

Project will utilize existing tanks, berths and pipeline infrastructure.

Estimated send out capacity will be around 16 million tons of LNG per year.

PARTNERS

Golden Pass LNG is owned by affiliates of Qatar Petroleum and ExxonMobil.

Partnership of two leading energy companies with an unrivaled record of producing, shipping and marketing natural gas globally.

Extensive experience of the project shareholders provides the technology, marketing and financial strength to construct a world-class liquefaction and export facility.

COMMITMENT

Safety Project would be constructed and operated with the same unwavering commitment to safety as the existing facilities. Since operation, there have been zero lost-time injuries in the Golden Pass employee base.

Environment Project would leverage the existing site and facilities, minimizing environmental and community effects. In addition, Golden Pass' project mitigation efforts will help restore wetlands in the region.

Community For the new project, Golden Pass will build on its long-standing partnership with Sabine Pass and the southeast Texas communities.

BENEFITS

\$10 billion investment
in infrastructure at the facility

\$34 billion in U.S. economic gains
over life of project

\$5 billion in taxes
at local, state & national levels

19,000 construction jobs | **7,000** jobs at peak construction

More than **200 direct full-time jobs** during operations

Expected to generate nearly **5,200 direct & indirect full-time jobs** for the life of the facility
